Aims and Objectives

The 36th National and 24th International Chemistry Conference, themed "Chemistry for Sustainable Development" aims to bring together leading researchers, innovators, and industry experts from around the globe to discuss the latest advances in the field of chemical sciences. This event will provide a vibrant platform for:

- Presenting cutting-edge research in the field of chemical sciences.
- Engaging in interdisciplinary dialogue across chemical sciences and chemical engineering.
- Strengthening collaborations between academia and industry across the country.
- Engaging local researchers with foreign researchers to find opportunities for possible collaborations.
- Encouraging early career researchers and students through dedicated sessions and awards.
- Offering an inspiring environment for sharing ideas, forging new partnerships, and shaping the future of chemical sciences.
- Organizing plenary and keynote lectures by internationally recognized scientists, oral and poster sessions, as well as networking and social events.
- Celebrating 100 years of success of School of Chemistry/Institute of Chemistry that had the privilege of producing many eminent Scientists of National and International repute including Nobel Laureates.
